

Play Testing Plan

1. Purpose of Play Testing

The goal of play testing is to evaluate how the game's difficulty and pacing affect player engagement and frustration. We want to ensure the game provides an enjoyable challenge without being too easy or too difficult.

2. Selected Testers

- Game developers
- Volunteer players

These testers provided both technical and player-focused perspectives.

3. Observation Method

During play testing, we observed:

- Player emotions and reactions
- Level of engagement
- How well players handled the difficulty level
- Whether gameplay felt too easy or too hard

4. Focused Questions & Player Responses

Which parts were frustrating?

- The fox's scale was too small compared to the coffee cups and background.
- The score was difficult to see because it blended into the background.

Did you get the feeling of Rollins Campus and community while playing?

- Many players said yes, they could see the vision and feel the environment.

Is the game too difficult or too easy?

- Players found it difficult at first, but after some time they were able to get the hang of it.

Is the game engaging?

- Yes, most players found the game engaging and enjoyable.

5. Documentation & Intended Improvements

Based on feedback, we will focus on the following improvements:

- Scale of Fox and Coffee Cups
 - Increase the size of the fox
 - Improve jump movement
 - Adjust spacing between cups
 - Make coffee cups longer
- Sound Effects
 - Add or improve sound effects for jumping and dying
- Score Visibility
 - Make the score more prominent and easier to see
